

Minimum subscription to Nordea Pro Stable Return Fund to be reduced

As of 9 November 2020, the minimum subscription to Nordea Pro Stable Return Fund, which is an equity fund, will be reduced to million euros.

For initial investments, the minimum subscription to the fund was increased to 100 million euros in 2018, as the fund's size had grown rapidly. This decision was made to ensure that the fund can be managed as efficiently as possible while protecting the unitholders' interests. Now we have deemed efficient portfolio management possible to the extent that allows the fund to receive new investments as before.

We have not restricted the ability of existing investors to make additional subscriptions to the fund in the usual amounts at any point. Therefore this decision will have no impact on existing unitholders.
